## **Basic Information**

This Policy is carried out within the context and spirit of the school's Mission Statement. It supports and reinforces the aims of St Catherine's Primary and Nursery School, valuing all children equally and as individuals encouraging them to grow together and reach their potential.

In contrast to the policies for specific curriculum subjects, this policy relates to the whole life of the school. Of particular importance in promoting spiritual, moral, social and cultural development (SMSC) is the example set by adults in the school, the quality of relationships and the standard of daily collective worship.

## **Rationale**

The statutory requirement that schools should encourage pupils' Spiritual, Moral, Social and Cultural Development (SMSC development) was first introduced in the 1988 Education Reform Act.

The Act states that the curriculum for a maintained school must be a balanced and broadly based curriculum which: - *Promotes the **spiritual, moral, social and cultural development of pupils at the school and of society; and prepares pupils for the opportunities, responsibilities and experiences of adult life.***

The National Curriculum stresses the importance of ensuring SMSC development is explored through other curriculum subjects:

*All National Curriculum subjects provide opportunities to promote pupils' spiritual, moral, social and cultural development. Explicit opportunities to promote pupils' development in these areas are provided in Religious Education and the non-statutory framework for Personal, Social and Health education (PSHE) at key stages 1 and 2. A significant contribution is also made by school ethos.*

effective relationships throughout the school, collective worship, and other curriculum activities. We believe that the planned promotion of the spiritual, moral, social and cultural development of our children is fundamental to the work of our school.

*'Catholics believe that Religious Education is not one subject but the foundation of the entire educational process. The beliefs and values it communicates should inspire and unify every aspect of school life. It should provide the context for and substantially shape the school curriculum and offer living experience of the life of faith in its practical expressions.'*  
Bishops of England and Wales, 1988

*Our Mission Statement commits us to the education of the whole child (spiritual, physical, intellectual, moral, social, cultural, emotional) and we believe that this is an integral part of education.*

***Our aim is to create pupils who will Challenge, Change and Transform in their mission to build the Kingdom of God.***

### **Spiritual development**

Pupils' spiritual development involves the growth of their sense of self, their unique potential, their understanding of their strengths and weaknesses, and their will to achieve. As their curiosity about themselves and their place in the world increases, they try to answer for themselves some of life's big questions of purpose and meaning. They develop the knowledge, skills, understanding, qualities and attitudes they need to foster their own inner lives and non-material wellbeing. As a Catholic school, we place special emphasis on the specific teaching and beliefs of the Catholic faith, both within the daily life of the school and through the curriculum.

### **Moral development**

Pupils' moral development involves pupils acquiring an understanding of the difference between right and wrong and of moral conflict, a concern for others and the will to do what is right. They are able and willing to reflect on the consequences of their actions and learn how to forgive themselves and others. They develop the knowledge, skills and understanding, qualities and attitudes they need in order to make responsible moral decisions and act on them. The system of rules and codes of behaviour established in our school is an important early introduction to issues of fairness for all and to the consequences of operating outside the accepted rule system. Pupils are encouraged to understand the need for a common code and to follow it from conviction rather than because of consequences or sanctions. Moral development, based on Christian principles, should enable pupils to become increasingly responsible for their own actions and behaviour.

### **Social development**

Pupils' social development involves pupils acquiring an understanding of the responsibilities and rights of being members of families and communities (local, national and global), and an ability to relate to others and to work with others for the common good. They display a sense of belonging and an increasing willingness to participate. They develop the knowledge, skills, understanding, qualities and attitudes they need to make an active contribution to the democratic process in each of their communities. The school, but in particular the classroom, provides a suitable environment for promoting social development within a Christian context. Pupils learn to lead, to use their initiative and to use individual skills and strengths when working together towards a common goal. The ability to be led, to support others and to recognise the different skills of other group members can be developed when children work co-operatively and are influenced by their own spirituality and morality.

### **Cultural development**

Pupils' cultural development involves pupils acquiring an understanding of cultural traditions and ability to appreciate and respond to a variety of aesthetic experiences. They acquire a respect for their own culture and that of others, an interest in others' ways of doing things and curiosity about differences. They develop the knowledge, skills, understanding, qualities and attitudes they need to understand, appreciate and contribute to culture. In order to make provision for cultural development existing knowledge,

interests and experiences are strengthened and then built upon further. In this way pupils gain a deeper understanding of their own culture and the factors which influence it and gain a broader understanding of other cultures and cultural influences. All areas of the curriculum are used to promote and develop cultural awareness, although the arts, music, dance, drama and art are often used. Culture gives expression to a community's spirituality, morality and social values.

At St Catherine's Primary School we recognise that the personal development of pupils, spiritually, morally, socially and culturally plays a significant part in their ability to learn and achieve. We therefore aim to provide a Catholic education that provides children with opportunities to explore and develop their gospel values and beliefs, spiritual awareness, high standards of personal behaviour, a positive caring attitude towards other people, an understanding of their social and cultural traditions and an appreciation of the diversity and richness of other cultures.

All curriculum areas have a contribution to the child's spiritual, moral, social and cultural development and opportunities for this are planned in each area of the curriculum. Christian values, principles and spirituality are explored in the curriculum, especially in RE and collective worship. The integrity and spirituality of other faith backgrounds is respected and explored. The diversity of spiritual traditions will be recognised, and pupils have opportunities to learn about other world faiths.

All adults model and promote expected behaviour, treating all people as valuable individuals and showing respect for pupils and their families. Children learn to differentiate between right and wrong in as far as their actions affect other people. They are encouraged to value themselves and others.

Children are taught to understand their rights and responsibilities and the need to respect the rights of others. Shared and agreed classroom and playground rules promote responsible behaviour. All curriculum areas should seek to use illustrations and examples drawn from as wide a range of cultural contexts as possible. This is reflected in the teacher's planning and learning resources.
